

From Challenges to Solutions: Azul Arc in Action

February 25, 2025

Building Smarter MVPs: The FACT Framework for Risk-Free Innovation

At Azul Arc, we leverage the **FACT framework**—Frugal, Actionable, Critical, and Testable—to validate ideas efficiently in **MVP development and digital product innovation**. This structured approach minimizes risk, maximizes learning, and ensures smarter resource allocation.

Innovation in Reverse: How Working Backwards Leads to Better Products

Most companies plan by looking ahead, but **Amazon’s Working Backwards Method** flips the script—starting with the customer and working toward the solution. At Azul Arc, we apply this approach to enhance our “**Blueprint for Build**” framework, ensuring user needs drive our product development. This method clarifies priorities, defines key outcomes, and creates truly impactful digital solutions.

Resurgens Employee Mobile App: A Seamless Security Management Solution

This is a screenshot of a web browser displaying the login page for the Resurgens Security Services Administrative Portal. The page has a blue background with a faint pattern of the company logo. The main content is a white box containing the text "Resurgens Security Services Administrative Portal" and "Log In". Below this is an input field labeled "Email" and a grey button labeled "NEXT". At the bottom left of the white box, there is a link that says "Forgot password?".

Web

Mobile App

This is a screenshot of the mobile app interface for the Resurgens Security Services. The screen shows a blue header with the time "8:40" and battery level "58%". Below the header is a white box with the text "Resurgens Security Services" and "Log In". There is an input field labeled "Email" with a blue border and a blue button labeled "Next" at the bottom.

Resurgens, a leading security services provider, needed a solution to streamline guard workflows and enhance management oversight. We designed and developed a custom **Employee Mobile Application** security personnel to efficiently log reports, track tasks, and document incidents while ensuring real-time coverage through location tracking.

On the management side, the admin portal centralizes reporting and compliance tracking, making it easier for supervisors to maintain service quality and streamline client reports.

The result? A highly efficient, well-organized security operation that has significantly improved accountability and oversight. **Our client is thrilled with the app's impact, praising its ease of use and the operational efficiency it has brought to their teams.**

"They were extremely professional but made me feel at home. Azul Arc developed the project successfully, meeting the client's requirements. The team communicated effectively and listened well. They were professional and reliable; no areas for improvement were cited. Overall, the engagement was highly successful."

CEO, Resurgens Security Services

Bridging Innovation: Azul Arc & Strats GmbH Join Forces for Digital Growth in Switzerland

Azul Arc is excited to partner with **StratsGmbH** to expand our **digital solutions** into the Swiss market. This collaboration merges **Strats' expertise in business innovation** with our **custom web and application development** to empower Swiss SMEs and startups.
