
July 2026: From Compliance Gaps to Courtroom Wins

July 30, 2026

Is Your Agency's Website ADA Compliant — Or Just Lucky So Far?

Digital accessibility isn't a nice-to-have for government agencies anymore — it's the new front door to public service. In our latest post, we break down why waiting on ADA compliance only makes the fix more expensive, and what it really takes to build citizen-facing tech that works for everyone.

The \$2M Mistake Most Software Projects Make Before Day One

Most blown software budgets don't come from bad code — they come from bad assumptions made before development even starts. We dig into why a real discovery phase and intentional UX design are the highest-leverage decisions on any project, and how skipping them quietly costs organizations millions.

Racing the Clock: Georgia's New Tax Court, Delivered on Time

A screenshot of the Georgia Tax Court login page. The background shows a blurred image of a courtroom with white columns. On the left, the Georgia Tax Court logo is visible. The login form is a white box with a grey header that reads: "Existing OSAH ePortal users with Tax Court cases: You can sign in using your existing OSAH ePortal email address and password. No new account is required." Below this, it says "Already have an account?" followed by "LOGIN". There are two input fields: "Email Address *" and "Password *", each with a red eye icon for toggling visibility. A link "Forgot Password?" is below the password field. A dark blue "Login" button is at the bottom of the form. At the very bottom, it says "Don't have an account? [Create Account](#)" and "By continuing to use our site, you agree to our [Terms & Conditions](#) and [Privacy Policy](#)."

When the State of Georgia mandated a brand-new Tax Court, the Administrative Office of the Courts needed a fully functioning system up and running by July 1; no room for delay. Azul Arc stepped in to deliver a dedicated

instance of our eCourt platform, customized specifically for the new court's needs, covering everything from case management and scheduling to document generation and electronic filing. We also customized a public access portal, giving citizens and legal professionals a clean, easy way to look up case information online.

From kickoff to go-live in about 10 weeks, our team worked in fast, focused sprints to hit the state's deadline without cutting corners.

The result: the AOC now has a reliable, purpose-built system supporting every tax court proceeding, and the public has a modern portal to match.

Curious what else we've delivered? [Take a look →](#)

Have a big idea?

We'd love to be your technology partner. Let's turn your idea into a product.
